MARGARINE PRODUCTION
 FEBRUARY 1943

Reports from manufacturers of margarine to the United States Department of Agriculture indicate that 62,695,000 pounds of that product were produced during February 1943.

February 1943 production, again the heaviest on record for any period, was 29,856,000 pounds heavier than that of February 1942 and 31,931,000 pounds greater than the average for February for the 5 years, 1938-42.

Of the total amount produced, 6,336,000 pounds or 10 percent were manufactured from animal and vegetable oils and 56,359,000 pounds or 90 percent from vegetable and nut oils. Uncolored goods were 81 percent of the total and colored, 19 percent.

Dear Sir:

I have the honor to acknowledge the receipt of your letter of the 14th inst.

Very truly yours,

J. H. Duerksen

The following is a list of the papers which have been received from you since the last time I wrote to you. I have not yet had time to read them, but I am sure they will be of great interest to me.

I have also received from you a copy of the report of the Committee on the Study of the Chemical Industry, which I have also read. It is a very interesting and valuable report, and I am sure it will be of great interest to you.

I am sure that you will find the report of the Committee on the Study of the Chemical Industry, which I have also read. It is a very interesting and valuable report, and I am sure it will be of great interest to you.
